The Kerala Forest Research Institute (KFRI) is one of the six institutions under the Kerala State Council for Science, Technology and Environment (KSCSTE) of the Government of Kerala, established in 1975. By conducting time-bound multidisciplinary applied research in thrust areas of tropical forestry, KFRI has created a niche among the leading forest research organizations in the tropics. The Institute undertakes multidisciplinary research on all aspects of tropical forestry including wood science and technology, wildlife biology and socio-economics under the 7 Programme Divisions. KFRI has a sub-centre at Nilambur and a Field Station at Veluppadam for carrying out nursery and plantation trials, germplasm collection, etc. KFRI has the largest collection of bamboo and rattan species in India for research and conservation purpose. Also at Nilambur, there is a Teak Museum, the only one of its kind, devoted to a single tree species in the world; it is open to public, researchers, forest officials and others interested in teak. The Secretariat of TEAKNET has been relocated in KFRI to start functioning from 2008 with the support of FAO Regional Office for Asia-Pacific, Bangkok.

International Tropical Timber Organization

The International Tropical Timber Organization (ITTO) is an intergovernmental organization which brings together countries that produce and consume tropical timber to discuss and exchange information and develop policies on all aspects of the world tropical timber economy. The ITTO is headquartered in Yokohama, Japan and in July 2001 had 57 members, including the European Community, which together represent 95 percent of world trade in tropical timber and 75 percent of the world's tropical forests. The ITTO recognizes that a continuing supply of tropical timber on the world market depends on quality information about the trade and market place, on efficient timber production and processing methods and on sustainable forest management practices.
